Description ::

This dashboard presents a visual analysis of the sales performance for the last year. The goal is to provide a quick overview of our sales trends, highlight top-performing products and regions, and identify any areas that may require attention.

Create a dashboard that displays each graph using different types of charts. Additionally, utilize the 'Top' method to showcase the top names or values.

Also, include an additional measure name, such as 'Total Sales,' to calculate the sum of sales in different regions.
